Come out to see  
local celebrity Lisa Taylor  
from 99.5 The Wolf!

Addison is a 10 year old girl who came in this world destined for BIG things! Since birth, she has left an imprint on people's lives and has shown other's to never give up regardless of what life throws at you!

Addison was born with Larsen's Syndrome. At birth her hip was dislocated, both of her knees faced backwards and she had club foot. At 5 days old, she began her treatment at her local hospital, Texas Scottish Rite in order to correct these deformities. She has undergone 4 surgeries. Her knees are now facing the right way but, her legs do not bend.

Her next step in her medical journey is to travel to West Palm Beach, Florida this summer and undergo the 1st of several more surgeries with the end goal to have knees that bend.

Anyone who knows Addison knows she is a lover of life and that she is the first one to drop what she's doing to help others! Addison is not only an advocate for herself but for others with special needs in our community! She has accomplished more in this life time than most adults will ever experience! Every year on her birthday since Addison turned 7, Addison has chosen to raise money for her local hospital, Texas Scottish Rite. Since then, she has raised over \$135,000 to give back to Scottish Rite as a way to thank them for the care she has received since birth.
